

XML Radar Chart

Version:1.0

Created:22/5/2010

By:ActiveToFocus Team

Thank you down our product. If you or have **any problem** or **suggestion** or need **custom components development**, please contact us through [here](#).

Product Description:

This is a radar chart through xml.

Product Features:

- xml driven.
- support 2 kinds data type(contrasted,stacked).
- can set the radar chart style.

Product Use Method:

just open the xml file to set radar chart all style or add all element.

Drag radar chart into your project, by calling its load method to load the xml file you specify.

Such as: radar.load ("data.xml");

//-----

<radarchart>

<!-- all style to set -->

<style>

<!-- radar radius value -->

<radius>100</radius>

<!-- show units -->

<units>\$</units>

<!-- value shows the scale of the number of -->

<section>5</section>

<!-- 1 : line,2 : circle -->

<bordertype>2</bordertype>

<!-- 1 :contrasted ,2 : stacked-->

<charttype>2</charttype>

<!-- set border style -->

<borderstyle>

<thickness>1</thickness>

<color>0xffff</color>

```
<alpha>.15</alpha>
<fontsize>9</fontsize>
<fontcolor>0xffff</fontcolor>
</borderstyle>
```

```
<!--set axis style -->
```

```
<axisstyle>
  <thickness>1</thickness>
  <color>0xffff</color>
  <alpha>.4</alpha>
  <fontsize>12</fontsize>
  <fontcolor>0xffff</fontcolor>
  <fontspacing>5</fontspacing>
</axisstyle>
```

```
<!-- set tip style -->
```

```
<tipstyle>
  <fontsize>11</fontsize>
  <fontcolor>0xffff</fontcolor>
</tipstyle>
```

```
<!-- set all chart style , chart value equals graph value -->
```

```
<chartstyle>
